PROFESSIONAL EXPERIENCE

Jet Support Services Inc.

05/2026– Present

Technical Support Specialist

Chicago, IL

- Provide Tier 1 and Tier 2 end-user technical support for Windows environments. Including desktop hardware, software applications, Microsoft 365 services, and conference room A/V equipment in a fast-paced corporate environment.
- Deliver white-glove executive support and ensure prompt, professional resolution of technical issues while maintaining high customer service standards.
- Support Azure Active Directory and on-premises Active Directory account administration, including user provisioning/deprovisioning, and access management.
- Manage hardware asset lifecycle processes including receiving, imaging, deploying, and tracking devices to support both IT and AI-enabled workflows.
- Monitor security alerts and take corrective action to support endpoint and identity security best practices.
- Maintain hardware and software inventories, procure IT equipment and licenses, and track support activity in the ticketing system.
- Create and maintain technical documentation, user guides, and internal IT procedures to improve support efficiency and consistency.

SeoClarity

03/2024– Present

Technical Support Specialist II/Jr.SysAdmin

Chicago, IL

- Infrastructure Management
 - Conducted quarterly user access and asset audits to ensure compliance with SOC II certification standards.
 - Managed hardware asset lifecycle processes—including receiving, imaging, deploying, and tracking devices to support both IT and AI-enabled workflows.
 - Provided onsite and remote Level 1/2 Helpdesk support for global staff, resolving hardware, software, and network issues for Windows machines
 - Administrator for Microsoft, Entra ID, Google Workspace, Knowbe4, OpenAI, Zoho, and ManageEngine platforms
 - Utilized Zoho ManagedEngine platform to manage and deploy updates/security policies across company laptops, ensuring up-to-date systems.
 - Ensured continuous alignment with SOC 2 trust principles by auditing access controls and maintaining integrity of system configurations.
 - Supported onsite IT and technical projects, including product rollouts, system enhancements, and audit-related activities.
 - Performed routine system maintenance, monitor performance, and contribute to patching, upgrades, and system health initiatives.
- Technical Support
 - Updated documentation for Support team SOP's, processes, and client customizations
 - Delivered advanced troubleshooting and break/fix support, performing root-cause analysis, documenting solutions, and meeting established SLAs.
 - Developed advanced Excel reports, performing data aggregation, extraction, and analysis to support AI initiatives, client operations and internal reporting needs.
 - Collaborated with Account Managers, product teams, and cross-functional groups on client training, technical initiatives, and AI product improvements.
 - Created technical documentation, knowledge base articles, and instructional videos to increase user adoption of AI tools and improve team efficiency.
 - Maintained strong customer satisfaction through clear, proactive, and empathetic communication, ensuring a seamless support

experience.

- Identified recurring issues and escalations, recognizing patterns that may indicate wider system or company-wide incidents
- Configured client domains based on work order
- Brought a positive, collaborative mindset to daily work, fostering a supportive and high-performing team environment.
- Primary contact for end-user support, troubleshooting issues and working with development teams to provide timely Resolution

SAP America
